

Want to understand today's technology markets — who's using the hottest new products, and the old standbys?

Looking to spot the latest trends, but can't wait for custom study results?

Want actual information from real world users, not speculations or predictions?

Then you need the Technology User Profile® — Top 10 Technology States Profile Report from MetaFacts.

This Technology User Profile – Top 10 Technology States report examines today's complex environment of technology users to deliver the facts you need on today's technology use, and tomorrow's trends.

This report focuses on the U.S.'s top 10 technology spending states: California, Texas, New York, Florida, Illinois, Pennsylvania, Ohio, New Jersey, Michigan, and Georgia. This information can be used in a variety of ways by vendors to understand the profiles of the heaviest technology users and purchasers.

Now a single report gathers summary results from a large representative sample of over 28,000 households on their habits and plans for use of PCs and various consumer electronics. You see precise, actual information on how they buy and use technology, not speculations or predictions of what they might be doing.

The Top 10 Technology States report is built on the strength of the Technology User Profile, conducted continuously since 1983 and providing a rich, comprehensive examination of the key aspects of technology use across the complete spectrum of environments and consumers. For the Top 10 Technology States report, the experienced MetaFacts team draws on this year's profile as well as prior year's results to select the key research you need for a high level, yet detailed look at technology purchases, usage and plans.

Using the TUP - Profile Reports gives you the confidence of meaningful research, available today, drawn from a current and complete range of real world users. It's the most effective way to get the kind of analysis you need — concise, focused and immediately available.
